Professional Summary

I am a dedicated professional with over 5 years of experience specializing in JavaScript and Python. While I am actively exploring opportunities in developer roles, I remain open to other software roles that align with my skills and interests.

Skills

- JavaScript (React, Vue, CSS, HTML)
- Python
- Microsoft Excel (VLookup, Conditional Formatting, Pivot Tables)
- SQL

Work Experience

CONFIGURATION ANALYST – FORWARD Insurance **–** (Full-time) November 2021 - Present

- Conducted data analysis to support decision-making and enhance reporting accuracy
- Utilized **JavaScript**, **HTML** and **CSS** to enhance frontend functionality, adhering to best practices and spearheading effective release management
- Use of strong development skills and software fundamentals when building insurance-based applications
- Experience working with large native code bases with significant complexity
- Collaborated and worked with a team of experienced developers in a team environment to build insurance-based applications using best practices
- Developed, tested, and supported products used by thousands of users daily
- Effectively communicated with technical and non-technical team members to ensure a shared understanding of new products and features
- Maintained confidentiality of system technologies and customer data to uphold security and protect intellectual property
- Through careful handling of release management, I ensured that improvements were promptly implemented which directly boosts sales and makes work processes smoother for my colleagues
- Excelled in a fast-paced and rapid growing startup environment, where adaptability, creativity, and problem-solving were key to meeting tight deadlines
- Utilized **Microsoft SQL Server Management Studio 18** to report on data for risk assessment, policy comparison, and general reporting
- Developed and maintained complex **Excel** formulas to replicate website policy calculations for offline use

PYTHON DEVELOPER – Scale AI – (Part-time) February 2024 – November 2024

- Collaborated with **Excel** sheets and various data tables to gather and organize information for training Language Learning Models (LLMs)
- Developed unique prompts for LLMs and evaluated their responses to ensure accurate **SQL** query execution
- Conducted thorough reviews of model outputs to verify correct data table interactions and **SQL** usage
- Performed code reviews and corrections for a **Python**-based language model, ensuring accuracy, and efficiency
- Conducted peer reviews of **Python** code to ensure adherence to best practices and coding standards
- Created code to assess **Python** proficiency through exercises and prompts to enhance the model's skills, promoting best practices and encouraging innovative approaches to problem-solving in **Python** development
- Debugged **Python** scripts and applications to improve functionality and performance

Education

DATA ANALYTICS CAREER COURSE – Skills for Hire Atlantic – New Brunswick, Canada June 2024 - November 2024

- Python (Pandas, Matplotlib, NumPy, Seaborn, SciPy, Scikit-Learn), SQL, Excel, Tableau, Jupyter, Anaconda, AWS, Cloud Fundamentals and Core Services, Security and Architecture in the Cloud, Cloud Computing Essentials, Relational Database Design, Data Wrangling, Exploratory Data Analysis, Data Science, Natural Language Processing, Data Preparation and Visualization, Organizing Data and Advanced Visualization, Data Dimensions, Measures and Aggregations

BACKEND DEVELOPER COURSE – boot.dev – Remote November 2023 – August 2024

- Python, JavaScript, SQL, Computer Science, Data Structures and Algorithms

ELECTRICAL TECHNIQUES COURSE – Niagara College – Welland, ON, Canada September 2015 – May 2016

- Electrical Trades, Electronics Concepts, Mathematics
